

William F. Jones
Director, Solutions Delivery
New Energy Solutions

June 28, 2017

Mr. Stephen Pike
C.E.O.
Massachusetts Clean Energy Center
63 Franklin Street, 3rd Floor
Boston, MA 02110

Dear Stephen,

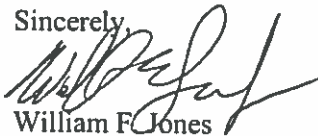

It is my pleasure on behalf of National Grid (“National Grid” or “Company”) to provide this letter in support of E4TheFuture’s (“Developer”) attached Massachusetts Clean Energy Center (MassCEC) Microgrids Program application associated with their proposed microgrid project located in Worcester, MA (“Project”).

National Grid is an electricity and gas company that connects consumers to energy sources through its networks. The Company is at the heart of one of the greatest challenges facing our society - to create new, sustainable energy solutions for the future, which includes providing increased energy resilience such as microgrids. In the Northeastern United States, National Grid connects more than seven million gas and electric customers to vital energy sources, essential for our modern lifestyles.

National Grid shares MassCEC’s vision of accelerating the deployment of microgrid technologies in the Commonwealth – a technology that National Grid believes could be of future benefit to customers and the distribution grid. Pursuant to the MassCEC’s microgrid funding opportunity application requirements, National Grid has been asked by the applicant to support the Developer’s feasibility study into their claim that the proposed microgrid may improve the resiliency of the power system within the microgrid, provide real data on the operation of microgrids, and offer certain other benefits such as improved reliability. National Grid plans to support the feasibility study by providing technical and regulatory input to inform the design of the microgrid technology.

We look forward to engaging with the Developer in this effort. Should you have any questions regarding the Company’s support and approach to microgrids and Microgrid Program applications, please do not hesitate to contact me at 781-907-3352 or William.Jones@nationalgrid.com.

Sincerely,

William F. Jones
